

OVER 800,000,000 SCENARIOS IN A BOX

We can't be sure what the shift has in store for us; it's as random as pulling a card from a deck. With ExDecks™, players randomly draw cards that build out a unique emergency management scenario for them to discuss and work through together in a training environment.

ExDecks Pro decks are built for trained public safety professionals.

The ExDecks Pro: EMS deck includes cards that simulate injuries caused by various scenarios, patient data & vitals, as well as complications and hazards. This deck includes cards for selecting Core Capabilities, identifying specialized equipment and resources, and has Location and Complication Cards that are designed for municipal agency operations.

See next page for full listing of box contents.

ExDecks solves several challenges that every training officer faces:

- 1 A detailed, unique scenario can be built in a matter of seconds, saving time & effort
- 2 Nobody knows the scenario details in advance, so everyone can participate
- 3 The randomization and details of the scenario is not limited to the training unit's creativity or planning capacity

CUSTOM ARTWORK FOR DEPARTMENT ORDERS

Interested in ordering a Pro Deck for each station in your jurisdiction? Contact our support team at the email below to learn about our FREE* customization options including logo integration, custom location cards, box options, and more! *Free customization is available for orders of 20 or more.

BUILT FOR PUBLIC SAFETY

Does your department also run fire and rescue? Take your ExDecks experience to the next level by integrating our Pro: FIRE deck! Add rescue scenario cards to your incident for the ultimate test.

ExDecks PRO: EMS

WHAT'S IN THE BOX?!

KEY SCENARIO INFORMATION

OPTIONAL SCENARIO ENHANCEMENTS

NO "RIGHT WAY" TO PLAY

- Talk through a 5-min scenario at briefing
- Head into the bay and drill with equipment
- Pull a specific scenario card and run through multiple variations of that call
- Build the scenario and have everyone make their plan solo and write it down. Have everyone share their plan and discuss the variances.
- Mix it up and make it your own!

**Deployed by Public Safety Professionals
in 10+ states and Canada!**
